Part III Reading Comprehension							
Passage One							
It was Friday, the day of the field trip on which Miss Joan would take her class to pick apples.							
Miss Joan enjoyed picking apples with her students. She smiled as she led her students to the							
bus that would take them to the Greenly Apple Orchard (果园).							
The bus ride was bumpy and the kids were a little noisy, but still Miss Joan was smiling.							
The bus stopped in front of the Greenly Orchard Store and the class got off quickly and quietly.							
Miss Joan made sure everyone was there. "What a glorious, sunny, apple picking day," Miss Joan							
announced with her grandest smile.							
Mr. Greenly was there to greet them. "Let see, there are eighteen children and two adults at							
three dollars each. That will be sixty dollars, please."							
Miss Joan held up the brochure in her hand. "It says that the price is two dollars each," she							
pointed ort. "That's what I collected from everyone."							
"We' ve had to raise the price," Mr. Greenly stated.							
"You sent me this brochure after we made our reservation," Miss Joan complained, "and it says							
two dollars!"							

"Miss Joan, if you look at the bottom of this brochure," Mr. Greenly said, "you'll notice a very important statement."

Sure enough, in very tiny letters, it said, "Prices are subject to change without notice."

Miss Joan was determined to keep her good mood. She took a twenty dollars bill out of her own

purse and handed it to Mr. Greenly with the forty dollars she had in an envelope.

"Now children, do you all have your baskets?" Miss Joan called out. "Remember, you can pick as many apples six apples each."

"I beg your pardon!" Miss Joan was not smiling now. "The brochure says, 'ALL YOU CAN PICK'!"

Mr. Greenly pointed to the tiniest letters Miss Joan had ever almost seen. It also says, "Terms

and conditions of group reservations are subject to change without notice."

Miss Joan's good mood was now history. She didn't want to set a bad example for her students, so she said in a calm and quiet voice, "We're going home, give me our money back, please."

- 31. How many dollars did Miss Joan hand to Mr. Greenly?
- A. 20 B. 40

Passage Two

Both civilization and culture are fairly modern words, having come into prominent use during the 19th century by anthropologists(人类学家), historians, and literary figures. There has been a strong tendency to use them interchangeably as though they mean the same thing, but they are not the same.

Although modern in their usage, the two words derived from ancient Latin. The word civilization is based on the Latin civis, of a city. Thus civilization, in its most essential meaning, is the ability of people to live together harmoniously in cities, in social groupings. From this definition it would seem that certain insects, such as ants or bees, are also civilized. They live and work together in social groups. So do some microorganisms. But there is more to civilization, and that is what culture brings to it. So, civilization is inseparable from culture. The word culture is derived from the Latin verb colere, till the soil. But colere also has a wider range of meanings. It may, like civis, mean inhabiting a town or village. But most of its definitions suggest a process of starting and promoting growth and development. One may cultivate a garden; one may also cultivate one's interests, mind, and abilities. In its modern use the word culture refers to all the positive aspects and achievements of humanity that make mankind different from the rest of the animal world. Culture has grown out of creativity, a characteristic that seems to be unique to human beings.

One of the basic and best-know features of civilization and culture is the presence of tools. But more important than their simple existence is that the tools are always being improved and enlarged upon, a result of creativity. It took thousands of years to get from the first wheel to the latest, most advanced model of automobile.

It is the concept of humans as toolmakers and improvers that differentiates them from other animals.

s cleverness, be modified into a hook or a ladder. Monkeys have never devised a spoken language, written a book, composed a melody, built a house, or painted a portrait. To say that birds build their

nests and beavers(海狸)their dens is to miss the point. People once lived in caves, but
cleverness, imagination, and creativity led them to progress beyond caves to buildings.
36. What does the author think of the words "civilization", and "culture"?
A. They are identical.
B. They are different concepts.

A. people's way of life in cities.
B. people's ability to live together in cities.
C. a type of social organizations
D. an advanced level of social life
38. The Latin verb colere originally means ""
A. live in a city.
B. develop oneself
C. promote growth
D. cultivate the land
39. The author believes that creativity
A. is a unique feature of civilized beings
B. brings forth the improvement of tools
C. is the result of human development
D. helps the advance of culture
40. The author mentions monkeys in the last paragraph to show that
A. monkeys are the same as birds

B. people once lived in caves like monkeys

C. monkeys can never develop into human beings

D. man is different from other animals such as monkeys

Passage Three

The huge growth of global "ecotourism" industry is becoming an increasing concern for conservationists with mounting evidence that many wild species do not respond well to contact with human beings. overexposure to tourists has been linked to stress, abnormal behavior and adverse health effects in species such as polar bears, dolphins and gorillas (大猩猩), says a report in New Scientist.

While regulated ecotourism can help conservation efforts by encouraging people to manage endangered species and their habitats, many projects are poorly designed and unregulated, it says.

"Many ecotourist projects are unaudited, unauthorized and merely hint they are based on environmentally friendly policies and operations."

While regulated ecotourism can help conservation efforts by encouraging people to manage endangered species and their habitats, "many projects are poorly designed and hint they are based on environmentally friendly policies and operations."

Ecotourism is growing by 10 to 30 percent a year and an estimated 20 percent of tourists are thought to visit a conservation-based project. Philip Seddon, of the University of Otago in New Zealand, said that although most tourist projects conformed to basic guidelines on land use and not scaring wildlife, their full impact was rarely considered.

"Transmission of disease to wildlife, or subtle changes to wildlife health through disturbance of daily routines or increased stress levels may translate to lowered survival and breeding," he said. Research at the University of Auckland has shown that dolphins become restless and overactive when many tourist boats are present. When three or more boats are near, the dolphins rest for 0.5 percent of the time, compared with 68 percent when they are accompanied by a single boat. The findings are backed up by studies of dolphins in Britain. Researchers at the University of Manitoba in Canada have found that male polar bears easily disturbed by tourist vehicles, with a possible effect on their heart rate and metabolism(新陈代谢). That could reduce body fat levels and fitness, critical for survival.

In Africa, gorillas have picked up parasites introduced to their habitat by tourists and mongooses(蠓)have caught lung diseases from human beings. Experts said that the answer to the problems was better regulation and supervision of ecotourism. numbers are strictly controlled, is a good model. 41. Ecotourism is meant to _____. A. have tourists help in the conservation of wildlife B. have wild species respond well to contact with humans C. make wild species reduce stress and abnormal behavior D. make conservationists more concerned with wildlife 42. According to New Scientist, many ecotourist Projects _____. A. really encourage people to protect wildlife and its habit B. strictly follow environmentally friendly polices C. actually lack proper examination and official approval D. seriously damage the habitats of endangered species 43. What will happen to wildlife ultimately if the present "ecotourism" practice goes on? A. It will disturb their life. B. It will affect their health. C. It will increase their stress. D. It will threaten their survival. 44. According to the passage, the growth in the global "ecotourism" industry _____. A. reflects a growing concern for conservation B. arouses a growing concern for conservation C. coincides with a mounting concern for conservation D. originates from a greater concern for conservation 45. According to the passage, a solution to the "ecotourism" problem is to _____. A. encourage people to manage endangered species B. reduce the exposure of wildlife to human beings C. help wild animals increase their fitness D. prevent wildlife from catching human disease Passage Four Computers can beat chess champion Gary Kasparov at his game, count all the atoms in a nuclear explosion, and calculate complex figures in a fraction of a second, but they still fail at the

slight differences in language translation. Artificial Intelligence computers have large amounts of memory, capable of storing huge translating dictionaries and extensive lists of grammar rules. Yet, today's best computer language translators have just a 60 percent accuracy rate. Scientists are still unable to program the computer with human-like common sense reasoning power. Computer language translation is called Machine Translation, or MT. While not perfect, MT is surprisingly good. MT was designed to process dry, technical language that people find tedious to translate. Computers can translate basic phrases, such as "You foot bone's connected to your ankle bone, your ankle bone's connected to your leg bone." They can translate more difficult phrases, such as "Which witch is which?" Computers can also accurately translate "Wild thing, you make my heart sing!" into other languages because they can understand individual words, as long as the words are pre-programmed in their dictionary.

But highly sensitive types of translating, such as important diplomatic conversations, are beyond the scope of computer translating programs. Human translators use intuitional meaning, not logic, to process words and phrases into other languages. A human can properly translate the phrase, "The pen is in the pen (围养禽畜的圈)," because most humans know that it means that a writing instrument is in a small enclosed space. Many times, computers do not have the ability to determine in which way two identical words in one sentence are to be used.

In addition to using massive rule-programmed machines, computer programmers are also trying to teach computers to learn how to think for themselves through the "experience" of translating. Even with these efforts, programmers admit that a "thinking" computer might not ever be invented in the future.

- 46. Computers today are capable of _____.
- A. defeating the best chess player in the world.
- B. telling subtle differences between languages
- C. translating over 60 percent of difficult texts.
- D. doing human-like common sense reasoning
- 47. According to the passage, which of the following is NOT true?
- A. Computers can translate dry and difficult phrase.
- B. Computers can understand sensitive language.

- C. Computers can translate technical language
- D. Computers can understand pre-programmed word.
- 48. The major problem with computer translating programs is that computers _____.
- A. can not translate illogical sentences
- B. do not have a large enough capacity of memory
- C. can not understand grammatical rules
- D. do not have intuition to process language
- 49. To improve machine translation, computer programmers are trying to_____.
- A. use powerful rule-programmed computers
- B. teach computers to think by practice
- C. have computers compile translating dictionaries
- D. add explanations of words in computer programs
- 50. The passage suggests that _____
- A. the accuracy rate of machine translation cannot be raised
- B. it is impossible for computers to think as humans do
- C. only technical language is suitable for machine translation
- ${\it D.}$ it is impossible to determine of identical words

Passage FiveSeveral years ago during the dot-com passion, Manhattan lawyer John Kennedy sometimes wore a dark blue suit to meet potential Internet clients. But he soon realized that his conservative clothes were a strike against him before he even shook hands. so he began to do business in casual, open-shirt clothes.

But now the tables have turned. Today Silicon Valley executives are the ones often coming out in suits. No wonder that fortune 500 executives are dusting off their silk ties and pants. "I would say there is a trend now toward a little more business dress," said Kennedy. "I find myself wearing suits more."

While there isn't a rush toward formal office wear, clothiers and executives say the workplace uniform is heading that way. In many offices, men are wearing Jackets, ties and pants more frequently than a year age. Top women executives never went as casual as men, so the shift doesn't affect them as dramatically.

"Business casual" took several years to catch on. It started with casual Fridays, evolved to casual summers, then became casual everyday.

Observers mention many factors driving the trend Internet companies helped lead the dress-downmovement and other industries followed suit to attract workers. But with the collapse of many dot-coms, the relaxed look is becoming a style to avoid. Moreover, as the economy stumbles, more people are hunting for jobs or trying to keep the ones they have, and appearance counts. US President Bush wears a coat and tie in the White House office and expects his staff to dress "professionally," which some say sets a tome for the nation.

Chuck Wardell, managing director of a recruiting firm, believes a lot of employees like a stiffer uniform. "They're going to work. They don't want to feel like they's going to a picnic."

- 51. "Business casual" was prevalent several years ago because _____.
- A. the Manhattan law business grew very quickly
- B. shaking hands with clients became popular
- C. the country was fighting the conservatives
- D. the Internet companies boomed then
- 52. When the "business casual" prevailed, _____.
- A. businessmen wore ties only in workplace
- B. businessmen didn't wear ties at all
- C. businesswomen didn't wear formally in workplace
- D. businesswomen still wore formally everywhere
- 53. The Fortune 500 executives _____.
- A. set the trend toward more casual wear
- B. are particular about what they wear
- C. begin to wear suits more often than before
- D. are usually indifferent to fashion trend
- 54. At the beginning of the "business casual" trend, business people wore casually_____.
- A. when meeting clients
- B. on weekends
- C. in summer

- D. almost everyday
- 55. It is implied in the passage that the change of business dress from the casual to the formal reflects _____.
- A. the changed of people's taste in fashion
- B. the ups and downs of the fashion industry
- C. the ups and downs of the Internet companies
- D. people's difference in business dress
